

Workshop on Simulation of Cell Membrane Proteins

Institute of Biochemistry and Biophysics,
University of Tehran, Tehran, Iran
June 1, 2017

Organizers:

H. Mobasheri,

Laboratory of Membrane Biophysics and Macromolecules,
Institute of Biochemistry and Biophysics, University of Tehran

S. Mehdi Vaez Allaei,

Department of Physics, University of Tehran

Molecular dynamic simulation of cell membrane proteins

Arman Fathizadeh

University of Texas at Austin, Institute for Computational Engineering and Sciences,
Austin, USA

Application of coarse grain simulation of membrane proteins

Masoumeh Ozmaian

Department of Chemistry, University of Pittsburgh,
Pittsburgh, USA

Using continuum mechanics models for simulation of membrane proteins

Omid Bavi

Department of Physics,
University of Tehran,
Tehran, Iran

Simulation of protein effects on the membrane surface tension

Mahriar Amininasab

School of Biological Sciences, University of Tehran,
Tehran, Iran.

Computational biophysics Structure and dynamics of nano-channel forming proteins in real time

Hamid Mobasheri

Institute of Biochemistry and Biophysics,
University of Tehran, Tehran, Iran
